TECHNICAL SKILLS

Backend Development: Django, Flask, FastAPI, Django Rest Framework
Front-end Technologies: React.js, JavaScript, jQuery
Languages & Databases: Python, MySQL, PostgreSQL, SQLAlchemy
Generative AI: LangChain, LangGraph, OpenAI API, Prompt Engineering
Microservices & Event-Driven: Kafka, Event Bus, AWS Lambda, WebSockets
Cloud & Infrastructure: AWS (Lambda, EventBridge, S3), Docker, Docker Compose
DevOps & CI/CD: GitHub Actions, Docker, Nginx, Celery
API Integrations: Stripe, Twilio, Elasticsearch
Version Control: Git, GitHub

EXPERIENCE

CodingCops

Lahore, PK

Software Engineer

Mar 2025 – Present

- Worked on a **distributed microservices system** using **FastAPI**, enabling independent scaling and deployment of services across a privacy-focused SaaS platform.
- Built full-stack features using **FastAPI** on the backend and **React** on the frontend, delivering end-to-end functionality across multiple product modules.
- Designed and implemented **event-driven architectures** using **Kafka** and **event buses** for asynchronous inter-service communication, ensuring data consistency and loose coupling.
- Developed and deployed **AWS Lambda** functions for serverless workloads, optimizing cost and performance for event-triggered processing pipelines.
- Implemented subscription and billing systems integrating **Stripe**, handling invoices, plan upgrades, and webhook-driven workflows.

The Hexaa

Lahore, PK

Associate Software Engineer

Feb 2024 – Mar 2025

- Developed and maintained backend services using **Django**, **Flask**, and **FastAPI** for various applications, focusing on performance optimization and scalability.
- Implemented CI/CD pipelines with GitHub Actions, Docker, and Nginx, reducing deployment time by 20%.
- Built an **AI-powered chat application** enabling users to create custom agents via prompts and interact with them using slash commands, leveraging **LangChain** and **LangGraph** for multi-step reasoning and agent orchestration.
- Developed intelligent data processing and recommendation features using **LangChain** for automated tagging, classification, and content moderation workflows.
- Built a Flask backend for automating sales training sessions, feedback loops, and performance tracking, with **LangChain**-powered intelligent recommendations.

MeisaSoft

Lahore, PK

Python Developer Intern

Nov 2023 – Jan 2024

- Contributed to building a full-stack **eCommerce application** with Django and FastAPI backend, integrating **Stripe** for secure payment processing and **WebSockets** for real-time updates.
- Utilized **Elasticsearch** for optimized search functionality and **Celery** for background task processing.
- Assisted in implementing AI-driven features including real-time classification using generative AI tools.
- Improved requirement analysis and documentation translation into functional features.

EDUCATION

National University of Sciences and Technology (NUST)

Rawalpindi, PK

Bachelor in Computer Engineering

Sep 2019 – Aug 2023

Cumulative GPA: 3.36/4.0
